- **Simple to Set-Up & Maintain**
- **Eliminates Hard Work**
- **Hangs Easily, Just Water**
- **Grow Organic Too!**

The Topsy Turvy® Tomato Planter is the most ingenious invention to grow nice delicious tomatoes. Because the Topsy Turvy® is upside down, gravity pulls the water and nutrients directly from the root to the fruit, giving you up to 30 lbs. of deliciously ripe tomatoes per plant! It's so simple to use and works perfectly. Just place any tomato plant in the planter, add your favorite potting soil, hang it up and water. The sun warms the plant like a greenhouse, the root system explodes and thrives inside the planter. Plus, hanging in the air eliminates ground fungus, harmful bacteria, cutworm damage, use of pesticides, digging & weeding and backbreaking work. What's more, it can also grow cucumbers, peppers, zucchini, and more, perfect for home-made sauces, sandwiches and salads.
