

## HammerHead PK 9/18

Hammerhead contains ratios of Phosphorous (P) and Potassium (K) which enhances blooming and produces larger yields. Our 9/18 ratio is ideal for the flowering and fruiting plants you love to grow. It contains the highest quality P and K, which increases the absorption which will result in heavier harvest. Use one week after the start of the bloom cycle and continue using until one week before harvest.

### GUARANTEED ANALYSIS

Available Phosphate (P <sub>2</sub> O <sub>5</sub> ).....	9.0%
Soluble Potash (K <sub>2</sub> O).....	18.0%

### Derived from:

Mono Potassium Phosphate, Sulphate of Potash.
