

NoShock

NoShock has been scientifically developed to substantially eliminate transplant shock. NoShock is the only transplant solution which promotes root development as well as increases nutrient uptake to produce healthier, vigorous, more robust bedding plants, flowers, vegetables, shrubs and trees. All backed by our performance guarantee.

Directions:

Bedding plants, vegetables, flowers: Mix 10 mL (2 tsp) of NoShock per litre (quart) of water. Use 250 mL (1 cup) of NoShock mixed solution per plant in a 30 cm (12 inches) diameter x 30 cm (12 inches) deep hole. You can also dip the root ball into NoShock mixed solution and then plant.

Seedlings: Use NoShock mixed solution immediately after planting and once a week until seedlings break the soil surface. Carefully water using 5 mL (1 tsp) of NoShock per litre (quart) of water. Evenly water using 500 mL of NoShock mixed solution over each 25 cm x 50 cm (10 inch x 20 inch) planting flats.

Guaranteed Analysis

Nitrogen (N).....	8.0%
Phosphorous (P ₂ O ₅).....	6.0%
Potassium (K ₂ O).....	12.0%

Warning:

Do not swallow. Keep out of reach of children.
