

CITRASOLV®

Concentrate Usage Guide

Citra Solv Cleaning Applications:			
	Citra Solv:	Water:	Container:
Heavy-duty cleaning	1 oz.	4 oz.	Spray bottle
General purpose & light spotting	1 oz.	16 oz.	Spray bottle
Floors, walls & cars	1 oz.	1/2 gal.	Bucket

Ovens & Grills, Cooking Grease — Use full strength. Using a paper towel, sponge or brush, apply to surface to be cleaned and allow to stand (a few minutes for cooking grease on stoves, at least 15 minutes for grills and ovens). For ovens and grills, scrub surface with scrubbie sponge to remove burnt-on crud; repeat until all soil is removed; rinse with water. For stoves, oven hood or behind the stove, gently wipe clean with paper towel or sponge and rinse with water.

Heavy Grease, Oils, Tar, Machine Parts, Bike Chains, Engines, Brick, Concrete, Stone, Permanent Marker, Crayon, Fresh Paint, Wax, Adhesives & Gum— Use full strength. Apply with sponge, rag brush or spray bottle. Allow to stand for a few minutes. For brick, concrete and stone, scrub and rinse clean with water. For other cleaning, blot or wipe clean with a clean paper towel and rinse with water. (For metal parts, you may prefer not to rinse; the natural orange oil will act as an anti-rust agent.)

*** Carpets, Rugs & Upholstery** — Use general-purpose dilution in a spray bottle or bucket for cleaning stains. Pre-soak or pre-treat before extraction use. Great for heavily soiled traffic lanes, doorways, etc.

Extraction Carpet & Upholstery Cleaning — In a carpet extraction machine, fill solution tank with warm water and full strength Citra Solv at 2 oz. per gallon of water. Most extraction machine solution tanks have capacities of 3 to 10 gallons.

Cars & Boats — Use full strength to remove tar, bugs, tree sap, road paint, scum line and paint oxidation. Using a spray bottle, cloth or sponge, apply to area to be treated, wipe clean and rinse with water. Boat bilge cleaning is done by adding 8 oz. of full strength Citra Solv to water in bilge and letting stand for 20-30 minutes, then lightly scrubbing with a brush and rinsing out with water. Avoid contact with Plexiglas™ or high impact poly styrene plastics; Citra Solv may cause damage.

Laundry Spotter — Use the general purpose dilution in a spray bottle. Apply to spot on fabric to be treated and wait 15 minutes before adding to wash. Before using, always spot test on an out-of-the-way area for colorfastness.

Paint Removal — Use full strength to remove all types of paint from concrete, cars, brick, stone, glass, paint brushes, hands, tile, etc. For paint brushes, allow to soak for several minutes, then rinse with water.

* BEFORE USING, ALWAYS SPOT TEST ON AN OUT-OF-THE-WAY AREA FOR COLORFASTNESS. NOTE: AVOID CONTACT WITH SOME PLASTICS; MAY BE DAMAGING.

CAUTION: COMBUSTIBLE LIQUID.

Do not use or store near sparking equipment or open flame. Avoid contact with eyes and prolonged or repeated contact with skin. Do not ingest.

EYES: Flush thoroughly with water for at least 15 minutes. Get immediate medical attention.

SKIN: Wash exposed area thoroughly with soap and water.

INGESTION: Do not induce vomiting. Give one or two glasses of water or milk to dilute the product and get immediate medical attention.

KEEP OUT OF REACH OF CHILDREN

CONTAINS: D-Limonene (clear liquid from the peel of the orange), essential oil blend & biodegradable cleaning agents (derived from coconut).
