**Effective**

# WILMOD SULPHUR EVAPORATOR

## WSE75

The WSE75 is an innovative sulphur evaporator. The most important part of the WSE75 is the patented IR-heating element type SSV.

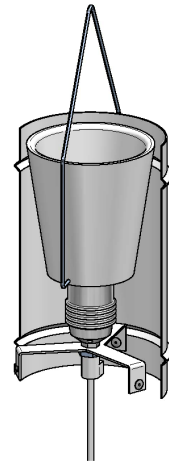

When the IR heating element is working, the temperature stays below the inflammability of Sulphur. This makes it safe to evaporate Sulphur.

The WSE75 is easy to clean with the supplied SSV-scraper. It is also possible to use a standard aluminium disposable. This makes dosing of Sulphur easier and the cleaning of the SSV, when used correctly, becomes unnecessary!

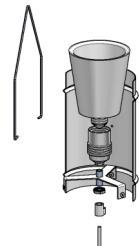

### ADVANTAGES of the WSE75:

- **ENERGY EFFICIENT**  
*Wattage is only 75W .*
- **SAFE**  
*The working temperature (190°C) of the IR heating element stays under the inflammability (230-260°C) of Sulphur.*
- **EFFECTIVE**  
*The high rate of evaporation makes the WSE75 very effective in the use of Sulphur.*

## TECHNICAL SPECIFICATIONS

- **Wattage:** 75 W
- **Operating voltage:** 110 V or 230 V
- **IR heating element:** SSV, E-27 Edison screw cap
- **Cable length:** 1.75 m, 3.00 m and 5.00 m with moulded-on plug or wieland
