USING TERRO® ANT KILLER II: Do not skimp on bait placements; the more bait placements, the better. Since invading ants usually have outdoor nesting sites, it often helps to put the product outside, close to where ants are found entering the structure. Ants typically follow defined trails from the nest to food or water. Placing TERRO® Ant Killer II close to these trails will improve control.

CONTROLLING AND ELIMINATING ANTS: First ants will come in large numbers, but soon disappear. This product is specifically formulated to allow worker ants to consume the product and survive long enough to carry the liquid back to the nest and deliver a dose to the rest of the colony. The

key to obtaining effective control is to monitor the placements and ensure there is always a fresh supply of TERRO® Ant Killer II on each placement. Complete control may take up to two weeks.

For further information on successful ant control using the TERRO® brand of ant control products, visit our web site at www.terro.com.

STORAGE AND DISPOSAL

Storage: Store in a cool, dry place. Do not store where children or animals may gain access.

Disposal: Securely wrap original container in several layers of newspaper and discard in trash.
