Azatrol® EC Insecticide is Gordon’s professional formulation of azadirachtin, a well-researched botanical insecticide/miticide with multiple modes of action, making it the perfect complement to an Integrated Pest Management (IPM) program. Azatrol is formulated from a highly active technical azadirachtin which provides efficacy at lower rates, low odor and superior emulsification.

Azatrol’s multiple modes of action also make it virtually impossible for insect resistance to develop. Azatrol acts as an anti-feedant, an Insect Growth Regulator (IGR) and as a repellent and ovipositioning deterrent.

**Anti-feedant:** Insects will feed less or not at all on treated foliage, ultimately starving to death.

**IGR:** Insects will fail to mature and reproduce.

---

**Azatrol’s control of different orders of insects or insects in different phases of their life cycle is due to the complexity of the azadirachtin molecule and the many modes of action inherent in azadirachtin.**

---

**Multiple Modes of Action**

- Anti-feedant
- Repellency
- Resistance Inhibition
- Pesticide Combinations
- Broad Spectrum
- Ovicial Effects
- Reproduction Interference
- Insect Growth Regulation (IGR)
- Azadirachtin A
- Azadirachtin B

---

**Azatrol's Key to Preventing Resistance**

The complex chemical structure of azadirachtin makes it virtually impossible for insect resistance to develop.

---

**RECOMMENDATIONS**

Use alone or in tank-mix combinations for control of chewing or sucking insects on indoor or outdoor ornamental plants, trees, shrubs, flowers, fruit and nut trees and garden vegetables.

**ACTIVE INGREDIENT:**

Azadirachtin . . . . . . . . . . . . . . . . . . . . 1.2%
Other Ingredients . . . . . . . . . . . . . . . . 98.8%

**EPA Reg. No.** 2217-836

**PACKAGING:**

- Plastic U.S. quarts: 12 X 1 per case:
  shipping weight . . . . . . . . . . . . . . . . 32 lbs.
- Plastic U.S. gallons: 4 X 1 per case:
  shipping weight . . . . . . . . . . . . . . . . 42 lbs.
