**EcoSMART**  
ORGANIC INSECTICIDE

**BED BUG KILLER**  
FOR CRACKS & CREVICES

Now there is an organic insecticide that is **safe to use around children and pets**. EcoSMART<sup>®</sup> Organic Bed Bug Killer is made from a patented blend of organic plant oils. It kills bed bugs and their eggs fast and works for weeks without any synthetic toxins or harmful residues. It's safe. It's effective. It's smart. Naturally. For additional information on protection against bed bugs, go to [www.ecosmart.com](http://www.ecosmart.com).

**DIRECTIONS FOR USE:**

**SHAKE WELL BEFORE USING. READ ENTIRE LABEL AND USE ACCORDINGLY.**

**BED BUG CRACK AND CREVICE TREATMENTS:** Important: Use the Special Application Straw provided. Insert straw into hole in sprayer button and place end of application straw into crack and crevice areas to be treated. Spray into these areas where bed bugs and their eggs may harbor. This includes cracks and crevices around joints in bed frames (after removing mattress and box springs), headboards and footboards, behind baseboards, floorboards, door/window frames, and in cracks and crevices in furniture located close to the bed (remove all drawers and clothes/other articles from drawers before application). Be sure to spray cracks and crevices inside furniture and on bottom of drawers. Wipe away excess product on hard surfaces. Repeat as necessary.

**NOTE:** Effective bed bug control typically requires thorough and multiple applications. Visit [www.ecosmart.com](http://www.ecosmart.com) for more information. Do not use this product on fabric (i.e. mattresses, box springs, pillows, bed linens or upholstery.) If fabric surfaces are accidentally sprayed, wash with soap and water. While staining is unlikely on hard surfaces, as with most household products, it is recommended to test for staining on an inconspicuous area of all surfaces to be sprayed before using. Wipe away any excess product on furniture immediately after application. To prevent slipping on hard surfaces, wipe away excess product with a dry cloth.

**PRECAUTIONARY STATEMENTS:** Caution - We recommend good safety practices when using any pesticide, such as avoiding contact with eyes and skin and keeping out of the reach of children. If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If irritation persists, contact a physician.

**PHYSICAL HAZARDS:** Contents under pressure. Keep away from heat, sparks and open flames. Do not puncture or incinerate container. Exposure to temperatures above 130° Fahrenheit can cause container to burst.

**STORAGE AND DISPOSAL:** Store in a cool, dry area away from heat or open flame. When container is empty, offer for recycling if available or discard in trash.

**LIMITATION OF LIABILITY:** To the extent consistent with applicable law, EcoSMART makes no warranties of merchantability or of fitness for a particular purpose, nor any other express or implied warranty except as stated above. Buyer assumes all responsibility for safety and use not in accordance with label, directions and precautionary statements.

EcoSMART represents that this product is a Minimum-Risk pest control product, and qualifies for exemption from EPA registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA).
