

BUD IGNITOR 0-2-4

As Many Budding Sites As There Are Stars In the Sky!

One of the great joys in life during the summer is taking a leisurely country stroll on a long winding cobble stone path away from the city noise and lights with your favorite girl on your arm. With a gentle warm breeze blowing you look up in the sky and notice it's not any typical night, it's crystal clear and the stars run on forever. They seem as if they've been lit up by some surreal power like millions of shimmering diamonds. You can't help it; all you can do is just stare as you take in this perfect moment.

Co-Founders' NO-RISK, 100% Money Back GUARANTEE

Here's what you're guaranteed to get when you use Bud Ignitor at the beginning of your flowering phase you're guaranteed to see faster flower formation and more budding sites. That's because Bud Ignitor contains special ratios and types of potassium, phosphorus and natural bloom inducing co-factors that ignite your plants floral production from top to bottom. Not only are you sure to get more flowers, but also you'll get maturing flowers that weigh more and have more peak bloom development. Just give Bud Ignitor to your plants when you flip to 12 hours and enjoy the dense, rich floral growth you and your friends love to see.
