

## Lady Bug Attractant

### Directions For Use

#### READ ENTIRE LABEL BEFORE USE

Lady Bug Attractant was developed to help home gardeners and professional growers manage a number of crop destructive insect pests. Lady Bug Attractant specifically attracts beneficial predatory insects: lacewings, lady beetles, hover flies and other beneficials attracted to the scent.

Encapsulated in a controlled release packet, the proprietary membrane releases effective rates of the attractant for 4 weeks. In a garden or nursery setting hang dispenser at crop height equidistant from each other or in "hot spots" where pest manipulation is needed. General use rate is one per 200 sq. ft. or one per large tree.

Lady Beetles: Aggressive predator of aphids, mites, scale crawlers, and caterpillar and beetle eggs and larvae, particularly Colorado potato beetle.

Lacewing: The larvae of lacewings are generalist predators and attack almost any soft-bodied insect such as aphids, mites, whiteflies, mealybugs, thrips, scale crawlers, caterpillars, psyllids and eggs of all. Each larva can kill 30 to 50 aphids per day.

Flower or hover flies. Adult flies feed on pollen and nectar, whereas larvae feed on all soft-bodied insects. Larvae can consume 200–800 aphids in a 7–10-day period. They play an important role in suppressing populations of phytophagous insects.

#### NOTES

-To prolong storage life of lure, refrigerate or freeze unused lures in their protective packet.

-If different lures are being used for other insects it is recommended that gloves or tweezers be used to handle lures so that cross contamination is avoided.

#### PRECAUTIONARY STATEMENTS

##### Hazards to Human and Domestic Animals

**CAUTION:** Avoid contact of lure with skin, eyes and clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. If irritation occurs, seek medical attention.

#### STORAGE AND DISPOSAL

**STORAGE:** Do not contaminate water, food, or feed by storage or disposal. Store in a cool dry place. Do not open until ready to use.

**DISPOSAL:** When lure element is exhausted, wrap and dispose of it in regular trash collection. Crush cardboard box and offer for recycling or discard in trash.

**NOTICE:** Buyer assumes all responsibility for safety and use not in accordance with directions.
