

RHINO SKIN

POTASSIUM
SILICATE

How the Rhino Survives No Matter What

The male rhinoceros leads his mate and their two calves through dust, drought and relentless heat. Attacked by microscopic parasites, by sucking worms, by vicious biting insects the size of small birds, by mites, mildews, molds... ripped by thorny foliage under the merciless eye of the blazing sun. Yet somehow the rhino and his family easily survive their ordeal to arrive at a safe oasis. All because of their tough rhino skin... Nature's very own living armor.

Derived from: Potassium Silicate

Also contains non-plant food ingredient:
Silicon (Si)..... 1.0%

 **Attention:** Corrosive. Do not swallow.
Keep out of the reach of children.

RHINO SKIN

POTASSIUM SILICATE

Advanced
Nutrients

Contents: 4 L / 1.1 gal (Net Weight: 6.2 kg / 13.6 lbs)

Directions: Use 2 mL per Liter during weeks
1 through 6 of your flowering phase.

Co-Founders' NO-RISK, 100% Money Back GUARANTEE

It's a sure thing that using Rhino Skin infuses your plants with the incredible strength of potassium silicate. When your plants intake Rhino Skin, it armors their cell walls inside and out so your plants are more resistant. But the benefits just keep on coming. Because Rhino Skin feeds foundational materials your plants use to make cell walls stronger and resin glands sparkle. You'll get your money back unless you see sturdier, more productive plants using Rhino Skin. And while it's true there are a couple of other silicate products on the market, Rhino Skin is the one formula tested and designed for the valuable plants you grow.
