

# Sensi Zym

ENZYME CONCENTRATE

## What's Going On In That Anthill?

It's fascinating to watch ants rushing to and fro back and forth from all around their anthill, down underground, and then back out again. These mighty mites are carrying root zone debris and other materials that weigh a lot more than themselves. They have underground dwellings more complex than any human city. What's more, they have several levels of societal organization and signaling that keeps them focused and successful. Not only that, but they provide huge ecosystem services by removing debris, recycling them, aerating soil, assisting roots, creating oxygenation and nutrition for plants. So when you see an anthill, step around it and have some respect. Those ants are doing valuable work that helps the world's roots do their work better!

**Derived From:** Proprietary Blend of Cellulose and Hemi Cellulose

**sensizym**  
ENZYME CONCENTRATE

Advanced Nutrients

Contents: 4 L / 1.1 gal (Net Weight: 4.8 kg / 10.6 lbs)

**Directions:** Use 2 mL per Liter during weeks 1 through 6 of your flowering phase.

**Technical Support: 1-800-640-9605**

### Co-Founders' NO-RISK, 100% Money Back GUARANTEE

You'll open your SensiZym container and pour it into your nutrient reservoir with the assurance that this is the most viable, most tested and most bioactive enzyme formula you can use. You'll see healthier plants, taking in more nutrients, growing faster and producing larger flowers because SensiZym contains scientist-selected enzymes. What's that mean for you? It means you get enzymes that have been tested for the types of gardens and plants you work with, so they go into your root zone, clean out debris, make your root zone material reusable, and provide your plants with more active roots that have more nutrients coming in for stronger plants. You'll see all this for yourself, or you'll get your money back, so get SensiZym today.
