Store bag in a cool, dry place out of direct sunlight. Do not open until ready to use. Do not use after expiration date. See expiration date on bottom of container. Do not mix with caustic fertilizers or pesticides. Use only on specified legume seed.

### General Information

Nature's Aid Organic Granular Garden Inoculant aids in growth and production of all varieties of garden beans, peas, and peanuts. This product will not aid in the production of soybeans.

Nature's Aid Granular Garden Inoculant contains billions of live bacteria that are essential in the nitrogen fixing process of garden legume plants. These bacteria, when properly placed in the root zone area of the soil, will actively convert atmospheric nitrogen into a useable form for the plant. Therefore, enabling the plant to produce its own organic source of nitrogen, leading to more lush vine growth and ultimately greater yields.

**Treats 150 Feet of Row Applied In-Furrow**

### Directions for Use

Prepare seed before planting. Make furrow and plant legume seed into furrow without covering seed with soil. Using a blunt device, open the container top. Rotate the lid to either shaker holes or wide opening to disperse inoculant. Apply granular inoculant in the furrow next to the seed. Apply ample amount to ensure proper nodulation of emerging roots. Over application is not detrimental and has shown to be beneficial. Cover the seed and inoculant with soil. To ensure optimum performance of Nature's Aid Garden Inoculant, water plants as directed throughout growing season.
