**DIRECTIONS:** Hand broadcast or use a cyclone type spreader or dispenser to apply **Green Light YardSafe Insect Repellent Granules**. Spread in a circular pattern outward from building or protected areas. Apply at a rate of ½ lb. to 1 lb. per 200 sq. ft. Initial treatments and severe infestations require heavier applications. Covers up to 4,000 sq. ft. Apply twice per season or as needed.

**Green Light YardSafe Insect Repellent Granules** are 100% natural, chemical-free, and safe around children and pets. An alternative to conventional pesticides, **YardSafe Granules** have a pleasant scent and are long-lasting. **YardSafe Granules** can be used around shrubbery, flowerbeds, vegetable gardens, and lawns. **YardSafe Granules** will repel Ants, Beetles, Chiggers, Chinch Bugs, Crickets, Fleas, Flies, Gnats, Roaches, Scorpions, Slugs, Snails, Termites, and numerous other insect pests. **YardSafe Granules** repels or impairs the mental faculties of insect intruders in treated areas, resulting in an exodus of unwanted pests.

**Green Light YardSafe Insect Repellent Granules** feature **EcoGranules**<sup>®</sup>, a carrier that combines reliable performance and quality with environmental responsibility. The layered, onion-like structure consists of a cellulose fiber core surrounded by multiple coating layers, enabling biodegradable organic delivery systems of superior absorption. **EcoGranules**<sup>®</sup> are biodegradable. The fine fibers in the core of the **EcoGranule**<sup>®</sup> are recycled from fine industrial wood dust or other fine cellulose material.
